

The 10th EAFES International Congress

**Theme : Nature's Contribution to People (NCP) in
East Asia: Toward the Kunming-Montreal Global
Biodiversity Framework (GBF)**

July 17 (Mon) - 20 (Thu), 2023

Ramada Hotel, Jeju, Korea

Welcome Message

Welcome Remark

The dream island Jeju island, Korea

Located on an island off the Korean Peninsula, Jeju island, the country's largest island, has a humid subtropical climate with very warm summers and cool winters. However, ocean-effect snow brings winter precipitation such as snow showers with strong winds during the winter. Jeju welcomes over ten million visitors every year, mainly from the South Korean mainland, Japan, and China.

Jeju island is proud of being full of natural wonders, three UNESCO heritages, a Biosphere conservation area, a Volcanic Island and Lava Tubes, and the Global geopark of Jeju. In addition, Jeju possesses a wonderful deposition of Indigenous Knowledge, and unique language, and unique ecological contrast from the pacific to mount Hallasan.

We welcome all of you to this picturesque island this summer.
